

FO Pipe Cleaner for 1,25mm adapters

Description

The performance of the individual fiber optic connector on the network is increasingly playing a very important role, since the transfer rates to rise steadily. The available attenuation budgets can be quickly exhausted. Therefore, it is always very important that not only very high-quality connectors are used with optimized end surfaces, but dirt is avoided on the connector surfaces. Very often, however, if improperly applied connector cleaning more dirt or even damage the connector. Only the tools listed below guarantee a reliable connector cleaning.

The unique “pipe cleaning tool” products are designed to clean the outside of single fiber ferrules and the inside of the connector to minimize the chances of debris contaminating the fiber tip.

Technical Data

Features

- Accommodates small form factor duplex, single fiber connectors, transceiver receptacles and lenses
- Suitable for factory or field use
