

Description

tML® is a patented, modular cabling system consisting of the three key components module, trunk cable and rack mount enclosure. The system components are 100 percent manufactured, pre-assembled and tested in Germany. They enable plug-and-play installation on site – especially in data centres, but also in industrial environments – within the shortest possible time. Heart of the system are the rear MPO/MTP® and Telco connectors, which can be used to connect at least six or twelve ports at a time. Depending on the module configuration, transfer rates of up to 400G are currently possible with SR4. The fibre optic and TP modules can be used together in a module carrier with a very high port density. The tde offers its tML® cabling system as a proven tML® standard system and in the highly innovative variants tML® 12, tML® 24, tML® 32 and now tML® 24+ System for extreme scalability and very easy migration to higher transmission rates such as 40G, 100G, 200G, 400G and 800G and more.

For reequip from 1U FO modules on 3U/5HP.

Technical Data

Material	Stainless steel
Mounting method	Front of the tML® - Rack Mount Enclosure with two countersunk bolts.
	QS-Managementsystem ISO 9001, ISO 14001 and TL 9000

Art.-No.	Description
TML-T06E2C-U	tML® - Reequip Kit 5HP for FO Module MPO/MTP® with Pins/6x E2000 Compact
TML-T06LCD-U	tML® - Reequip Kit 5HP for FO Module MPO/MTP® with Pins/6x LC Duplex
TML-T06RJ45-U	tML® - Reequip Kit 5HP for TP Module Telco/6x RJ45
TML-T06SCD-U	tML® - Reequip Kit 5HP for FO Module MPO/MTP® with Pins/6x SC Duplex
