

FO Stick Cleaner for 2,50mm adapters

tde - FO Cleaning Tools for Connectors and Adapters

The performance of the individual fiber optic connector on the network is increasingly playing a very important role, since the transfer rates to rise steadily. The available attenuation budgets can be quickly exhausted. Therefore, it is always very important that not only very high-quality connectors are used with optimized end surfaces, but dirt is avoided on the connector surfaces. Very often, however, if improperly applied connector cleaning more dirt or even damage the connector. Only the tools listed below guarantee a reliable connector cleaning.

The Stick Cleaning Tools are a dry cloth cleaning system that provides excellent cleaning performance for difficult to reach single fiber connectors such as SC, ST and transceiver interfaces, and lenses.
