tSML - FO Dark Fiber Module 19"/0.5U angled 16x MPO/MTP® Male/ 24x MPO/MTP® Male 50/125 $\mu$ OM4, SR4

## tSML - tde Semi Modular Link

tSML is a modular developed cabling system, which consists of two core components: module and trunk cable. The system components, preterminated with connectors and tested ex works, facilitate very fast installation of both twisted pair and fiber-optic cables. Ready-made trunk cables, providing a high number of pairs or fibers, can simply be plugged together using patch panels. Up to $96 \times$ LC duplex and/or $48 \times$ RJ45 of haven can be accommodated in such a way on 1 U . At the heart of the System are MPO/MTP® and Telco connectors, with which 12 optical fibers or 24 copper pairs can be connected simultaneously. Fiber-optic and twisted pair modules can be combined on 1 U within a panel without difficulty.

The end faces of the connectors are optimized by means of Lasercleaving and machine polish. The MPO/MTP® plug has a defined fiber hieght of $1-3.5 \mu$. The max. adjacent fiber height difference is $0.2 \mu \mathrm{~m}$ and for all fibers $0.3 \mu \mathrm{~m}$. All system components (modules, trunk cables and patch cords) are coordinated for the reaching of the performance particularly. The module is marked with sequential serial number and article number. The modules are ROHS compliant.
