

Stand-alone Fast Ethernet Media Converter, 100Base-TX to 100Base-FX

100Base-TX (RJ-45) [100 m/328 ft.]

to 100Base-FX 1310nm single mode (LC)

[20 km/12.4 mi.] Link Budget: 17.3 dB

Description

The E-100BTX-FX-05 is a stand-alone media converter that provides an interface between 100Base-TX ports and 100Base-FX ports, allowing users to integrate fiber optic cabling into 100Base-TX copper environments. Operating at Layer 1, the physical layer, data is passed through the converter at line speed, making it ideal for applications where low latency is essential.

Features

- Operates under heavy traffic loads without excess heat, so there is no need for a failure-prone internal fan
- Round trip delay of only 40 bit times – far below the Class II rating of 92 bit times
- Auto-Negotiation
