### RMS19-SA4-02 - 4-Slot Media Converter Shelf

# **Direct Attach Cables / Active Optical Cables**

A simple to install, cost-effective and interoperable solution

Often used for data center short-reach interconnects, Direct Attach, Active Copper and Active Optical Cables are an indispensable part of any network.

Terminated with transceiver-style connectors, they are designed to be used in the same ports as a typical SFP+ or QSFP transceiver, with no need for adapters or converters. Our DAC and AOC cables offer compatibility with a huge range of vendors, enabling the connectivity you need within the Top of Rack and End of Row environments.

- 10G, 25G, 40G & 100G product solutions
- Seamless interoperability with network equipment
- Multi-code options enabling different OEM vendors at each end of the cable
- $\bullet$  4x breakout cables, 40G QSFP+ to 4x 10G SFP and 100G QSFP28 to 4x 25G SFP28
- Fast Delivery, Custom solutions
- Compatible with Over 90 Systems
- Savings of up to 70%

## RMS19-SA4-02 - 4-Slot Media Converter Shelf

#### 4-Slot Media Converter Shelf, includes 4 brackets and 3 slot blanks

## **Features**

- Clean up your stand-alone media converter installations with this 19" rack mountable shelf
- Rack mount up to 4 stand-alone devices in a 1RU unpowered shelf
- Space saving design: save rack space in low density deployments: 19" rack mount, 1RU high
- Flexible: mix and match up to 4 Transition Networks stand-alone media converters
- Including ION stand-alone converters
- Including new Ethernet Extender converters
- Excluding the double-high converters
- Includes 4 converter mounting brackets
- Includes 3 slot blanks to cover unused slots
- Securely mounts the converters to the shelf

• Non-powered design: donâ t pay for power supplies twice. This low cost design allows the use of the power supplies that ship with the media converter.

- The shelf is deep enough to hold the power supply, helping to reduce the strain on the power connections
- Power cord tie-downs: help to eliminate the accidental disconnection of power supplies from the media converters.
