

CWDM-M551LCR - 4 Channel Mux/Demux CWDM

Lantronix / Transition Networks

4 Ch. + OSC, 1510/1530/1550/1570 + 1310nm, Duplex LC

Product Description

Transition Networks CWDM products use a passive technology that allows for any protocol to be transported over the fiber link, as long as it is at a specific wavelength. Transition Networks' CWDM Mux/Demux and Add/Drop Mux can provide a simple and affordable method to maximize existing fiber capacity with little or no increased cost.

4 Channel + OSC, 1510/1530/1550/1570 + 1310nm, Duplex LC

Features

- Increase bandwidth on existing fiber infrastructure
- Alleviate fiber exhaustion
- Transmit multiple protocols over an existing duplex fiber link by combining the fiber outputs of multiple media converters
- Provide scalable bandwidth of up to 10Gbps per channel over existing fiber links
- Plug-and-Play, no configuration of CWDM components
- Use existing standard optical ports on switches and routers
- Utilize Optical Line Converter as transponder
