

E-MCR-05 Ethernet Media Conv Rack Standard 12vdc J

Lantronix / Transition Networks

12-Slot Media Converter Rack

Description

Flexible design for growing networks simplify your installation of Transition Networks' stand-alone media converters with the Media Converter Rack. This 19" rack-mountable unit supports up to twelve media converters while the unique design allows for multiple connections, consolidated into a single device, making network connections easier and more efficient.

Features

- **Space Saving Design:** This device is powered by a single internal universal power supply; eliminating the need for the multiple power connections often associated with multiple converter installations. The unit saves space in the wiring closet by providing a means for mounting (12) converters in (3) units of rack space while reducing the number of wall outlet power connections required.
- **Convenience:** The media converters are hot-swappable. They can also be removed from the rack, powered externally, and used as stand-alone units in new applications as your network needs change in the future.
- **Cost Effective:** Easily rack mount the single-wide, 12 volt powered, Transition Networks' media converters that you already own, or buy stand-alone units today and rack mount them in the future.
- **Includes:** (12) Universal rack mount media converter brackets.
