

1-Port 10/100/1000 PoE+ Injector W/UK PS

Lantronix / Transition Networks

(1) 10/100/1000Base-T port PoE+ Injector

Description

Transition Networks' L1000i-at is a 1-port 10/100/1000Base-T PoE+ midspan injector which provides a simple, cost-effective, fully IEEE 802.3at compliant solution to upgrade existing infrastructure with PoE+. Powering high-powered PoE+ enabled network devices, such as PTZ dome network cameras, can be done without the need to install power outlets and electrical cabling.

PoE technology allows IP phones, wireless access points, and security network cameras to receive power, along with data, over standard Ethernet cables, leaving the network infrastructure completely unaltered. PoE technology also allows for easier installation in areas where power cabling and outlets are unavailable, thereby reducing installation costs.

Midspan injectors offer users the ability to take advantage of PoE technology while protecting investments they've made in purchasing, configuring, and deploying non-PoE supported devices such as standard Ethernet switches.

Features

- Power-over-Ethernet Injector for 10/100/1000Base-T
- Remote Power Feeding
- Overload and short circuit protection
- Mixes Ethernet and power on the RJ-45 port
- Delivers power up to 100 meters
- Light weight and compact size
- Plug-and-play
- IEEE 802.3at and IEEE 802.3af compliant
